**Better Practices of Project Management Based on IPMA competences, 2nd edition** John Hermarij 2020-06-11 This book is replaced by a new version, 3rd revised Edition Project management is a fast growing profession. The IPMA Competence Baseline (ICB) version 3, dating from 2007, gives a clear description of this profession based on 46 competence elements. This book gives the essential theoretical and practical background of each competence element, based on the leading sources. The structure of this book follows the order of the competence elements in the ICB version 3, divided into Technical competences, Behavioral competences and Contextual competences. For this reason it is the essential study book for everyone studying for the IPMA-D and IPMA-C exams, and for those project managers that have committed themselves to a lifelong professional development. In addition, the book had to be applicable to groups of project managers originating from diverse cultures. For this reason, this is not a book that tells how a Westerner must behave in an Arab or an Asian country, but one that looks at the different subjects covered in the ICB, as seen from diverse cultural standpoints. Each chapter is based on the same structure: Definitions, Introduction, Process Steps, Process steps, Special topics. Text boxes, additional to the main text, give additional explanation to the main text. An elaborate Index of terms allows that this book can be used as the information source to all aspects of project management.

*Experimental IR Meets Multilinguality, Multimodality, and Interaction* Norbert Fuhr 2016-08-22 This book constitutes the refereed proceedings of the 7th International Conference of the CLEF Initiative, CLEF 2016, held in Toulouse, France, in September 2016. The 10 full papers and 8 short papers presented together with 5 best of the labs papers were carefully reviewed and selected from 36 submissions. In addition to these talks, this volume contains the results of 7 benchmarking labs reporting their year long activities in overview talks and lab sessions. The papers address all aspects of information access in any modality and language and cover a broad range of topics in the fields of multilingual and multimodal information access evaluation.

**Marine Safety Management Systems: Theory to practice A Technical Business Guide** Marcell Greeff 2023-09-30 The maritime industry stands as a testament to human ingenuity and determination. It spans vast oceans, navigates through unpredictable weather, and transports goods and people across the globe. However, this industry's grandeur is balanced by its inherent risks and challenges, from the powerful forces of nature to the intricacies of international regulations. Safety, in all its dimensions - safety, health, environment, quality and energy (SHEQE) - is paramount in ensuring not only the well-being of seafarers but also the sustainability of marine operations. Marine Safety Management Systems: Theory to Practice offers comprehensive guidance to ship-owners, managers, and operators on elevating SHEQE performance within their ship management and operations. Dr. Greeff's empirical research for his doctoral degree identified Safe Operating Procedures as a pivotal indicator of an organizational safety management system, incorporated as "SMS2 - Resilient Work Practices" into the author's Safety Culture Maturity Development Model. This book bridges the gap between theory and practice, synthesizing research with real-world examples, culminating in a robust Marine Safety Management System Framework grounded in practical insights. Acknowledging the positive impact of effective management practices, the primary aim of this

Guide is to furnish the maritime industry with a model for implementing an Integrated Management System that addresses vital concerns. Suitable for use by marine companies operating various types of ships, its requirements are formulated broadly to ensure applicability across diverse ship operations and management approaches. This book stems from extensive research conducted during the author's pursuit of a Bachelor of Technology (BTech Degree) in Safety Management and the empirically validated Marine Safety Management System Framework (MSMSF). The MSMSF encapsulates best practices and regulatory adherence, encompassing the 13 mandatory elements of the ISM Code and providing essential tools for effective SMS procedures. Through the integration of current marine legal requirements and best practices, Dr. Greeff augments the body of knowledge and presents a pragmatic approach to Resilient Work Practices in the marine industry. The aim is to curtail incident frequency and accidents, striving for zero harm. Drawing upon examples and case studies, this book illuminates the benefits and challenges of implementing SHEQE standards in the maritime realm. By immersing themselves in this content and thoughtfully considering its recommendations, organizations can adopt the MSMSF or develop an effective in-house Resilient Work Practice Framework. Safety culture indicators and steps to cultivate the maturity of risk management are detailed, offering a holistic approach to safety culture development in the maritime sector. Marine Safety Management Systems: Theory to Practice is not just a guide but a vital resource for those engaged in or intrigued by the shipping sector, propelling the maritime industry toward safer, more sustainable, and more resilient operations.

**Design - Build - Run** Dave Ingram 2009-02-23 This unique and critical book shares no-fail secrets for building software and offers tried-and-true practices and principles for software design, development, and testing for mission-critical systems that must not fail. A veteran software architect walks you through the lifecycle of a project as well as each area of production readiness—functionality, availability, performance and scalability, operability, maintainability, and extensibility, and highlights their key concepts.

**Managing Humanitarian Relief** Eric James 2008 Responding Effectively to humanitarian disasters is far from straightforward, and relief workers often find themselves in a world of uncoordinated, highly competitive agencies working with cross-cutting purposes. Managing Humanitarian Relief is aimed at relief workers charged with putting together a programme of action to help people in extreme crisis. It provides humanitarian relief managers with a single comprehensive reference for all the management issues they are likely to encounter in the field. The book is organized in two parts. First, it provides an outline of different relief programming sectors: food and nutrition, health, water and sanitation, and shelter. Second, it presents 20 separate management topics that are essential for overseeing programmes. It's easy-to-use format includes checklists, tables, diagrams, sample forms, and no-nonsense tips from practitioners to help readers in emergency situations.

**Global Governance on the Ground** Nele Kortendiek 2024-11-06 Global Governance on the Ground offers a new approach to how international organizations govern. Through an in-depth look at the case of migration and asylum, the book argues that international organizations (IOs) not only govern global challenges through rules, standards, expertise, and numbers but also through practice on the ground. Much scholarship has been devoted to the question of how IOs become autonomous agents and exercise authority to shape governance outcomes. Far less attention has been given to the way IOs use their field access to govern global issues on the ground—without first going through formal policy channels or renegotiating their authority. The book demonstrates that through field-based practice, IOs directly regulate global issues in the spaces where they become virulent, in different locations across the globe. The book draws on ethnographic fieldwork at the European external border, comprising interviews at the headquarters of seven organizations, including the United Nations High Commissioner for Refugees (UNHCR), the International Organization for Migration (IOM), and three humanitarian NGOs. This, combined with an extensive document analysis, shows that field staff improvise to organize collective action on under-

regulated issues and that headquarter staff consolidate and diffuse their operational knowledge. The book conceptualizes this governance mode that operates at a low institutional threshold but largely determines the de facto governance of contested or crisis-ridden global problems.

**Information Retrieval Evaluation in a Changing World** Nicola Ferro 2019-08-13 This volume celebrates the twentieth anniversary of CLEF - the Cross-Language Evaluation Forum for the first ten years, and the Conference and Labs of the Evaluation Forum since - and traces its evolution over these first two decades. CLEF's main mission is to promote research, innovation and development of information retrieval (IR) systems by anticipating trends in information management in order to stimulate advances in the field of IR system experimentation and evaluation. The book is divided into six parts. Parts I and II provide background and context, with the first part explaining what is meant by experimental evaluation and the underlying theory, and describing how this has been interpreted in CLEF and in other internationally recognized evaluation initiatives. Part II presents research architectures and infrastructures that have been developed to manage experimental data and to provide evaluation services in CLEF and elsewhere. Parts III, IV and V represent the core of the book, presenting some of the most significant evaluation activities in CLEF, ranging from the early multilingual text processing exercises to the later, more sophisticated experiments on multimodal collections in diverse genres and media. In all cases, the focus is not only on describing "what has been achieved", but above all on "what has been learnt". The final part examines the impact CLEF has had on the research world and discusses current and future challenges, both academic and industrial, including the relevance of IR benchmarking in industrial settings. Mainly intended for researchers in academia and industry, it also offers useful insights and tips for practitioners in industry working on the evaluation and performance issues of IR tools, and graduate students specializing in information retrieval.
