Food Engineering Matcel Loncin 2012-12-02 Food Engineering: Principles and Selected Applications explores the principles of food engineering that are needed for resolving problems of food processing and preservation. This book is divided into 11 chapters that provide numerous effective examples and discussions of unique aspects of the food industry, which utilize these principles. This book discusses first the boiling heat transfer and the multi-effect principle for evaporators, as well as the application of this principle to the special problems involved in evaporation of liquid foods. The subsequent chapters cover the

principles of fluid dynamics and axial dispersion. The discussion then shifts to the effect of residence-time distribution on continuous sterilization processes. The concluding chapters examine the concepts of water activity and its effect upon various reactions important to food processing and quality. This book is intended for both students and practicing food engineers and technologists.

Disinfection, Sterilization, and Preservation Seymour Stanton Block 2001-01-01 This new edition is a comprehensive, practical reference on contemporary methods of disinfection, sterilization, and preservation and their medical, surgical, and public health applications. New topics covered include recently identified pathogens, microbial biofilms, use of antibiotics as antiseptics, synergism between chemical microbicides, pulsed-light sterilization of pharmaceuticals, and new methods for medical waste management. Fundamentals and Operations in Food Process Engineering

Susanta Kumar Das 2019-03-08 Fundamentals and Operations in Food Process Engineering deals with the basic engineering principles and transport processes applied to food processing, followed by specific unit operations with a large number of worked-out examples and problems for practice in each chapter. The book is divided into four sections: fundamentals in food process engineering, mechanical operations in food processing, thermal operations in food processing and mass transfer operations in food processing. The book is designed for students pursuing courses on food science and food technology, including a broader section of scientific personnel in the food processing and related industries.

The Guns of August Barbara W. Tuchman 2009-07-22 PULITZER PRIZE WINNER • "A brilliant piece of military history which proves up to

the hilt the force of Winston Churchill's statement that the first month of World War I was 'a drama never surpassed.'"—Newsweek Selected by the Modern Library as one of the 100 best nonfiction books of all time In this landmark account, renowned historian Barbara W. Tuchman re-creates the first month of World War I: thirty days in the summer of 1914 that determined the course of the conflict, the century, and ultimately our present world. Beginning with the funeral of Edward VII, Tuchman traces each step that led to the inevitable clash. And inevitable it was, with all sides plotting their war for a generation. Dizzily comprehensive and spectacularly portrayed with her famous talent for evoking the characters of the war's key players, Tuchman's magnum opus is a classic for the ages. The Proud Tower, the Pulitzer Prize-winning The Guns of August, and The Zimmermann Telegram comprise Barbara W. Tuchman's classic histories of the First World War era
