Western Science Fiction Literature in the 21st Century Heather Duerre Humann 2025-12-30 Western science fiction has evolved to reflect the social, cultural, and political issues of the contemporary world. While recent narratives maintain the core traits of Western science fiction--such as frontier settings, speculative futures, alien encounters, and advanced technology--they also engage with a broader range of concerns, reflecting the shifting anxieties and aspirations of modern society. Central to this shift is the genre's increasing focus on timely concerns like ecological collapse, identity, gender, power structures, and the impacts of technology on everyday life. Through the lens of narratives such as *Liminal States*, *The Arrivals*, *Upright Women Wanted*, and *Persephone Station*, this study illustrates how contemporary Western science fiction has adapted, offering diverse storylines that challenge norms while maintaining the genre's timeless appeal.

My Tank Is Fight! Zack Parsons 2006 A detailed and witty examination of 20 real inventions from WWII that never saw the light of day. Each entry includes full technical details, a complete development history, in-depth analysis, one or more illustrations and an acerbic fictionalised account of the invention's success or failure on the battlefield. These are the strangest inventions of WWII - from a 1000 ton tank to an aircraft carrier made out of ice - and for many of them, the original illustrations within are the only surviving images of the inspired lunacy they represent.

**Code Name Habbakuk** L.D. Cross 2012-04-15 In late 1942, Britain was desperate to win the ongoing Battle of the Atlantic. German U-boats had sunk hundreds of Allied ships containing millions of tons of cargo that was needed to continue the war effort. Prime Minister Churchill had to find a solution to the carnage or the Nazis would be victorious. With the support of Churchill and Lord Louis Mountbatten, eccentric inventor and amateur spy Geoffrey Pyke proposed a dramatic project to build invincible ships of ice—massive, unsinkable aircraft carriers that would roam the mid-Atlantic servicing fighter planes and bombers on missions to protect shipping from predatory U-boat wolf packs. This is the fascinating story of the rise and fall of Project Habbakuk and how an outlandish inventor, the British Navy, the National Research Council of Canada and a workforce of conscientious objectors tested the bizarre concept in the Canadian Rocky Mountains, far from the theatre of war.

**Your Next-Door Neighbor Is a Dragon:** Zack Parsons 2009-07-28 Finally, a book about the Internet that takes place outside the Internet! Your Next-Door Neighbor is a Dragon leaves the bleeps and bleeps behind for a series of surreal interviews and adventures with the people behind the computer screen. Something Awful's Zack Parsons risks life and sanity by meeting with people who believe they are real dragons and elves, attending a furry convention in costume, paying a visit to a white power group in Texas, talking shop with people who want to be swallowed whole, and witnessing the launching of the Ron Paul Blimp. More than a year in the making, this epic adventure is full to bursting with the jokes about wieners and poopy that made Something Awful a true Internet sensation. Have you added the book to your cart yet or do you just hate yourself that much?
