

Painting Light In Oils

Fill Your Oil Paintings with Light & Color

Kevin Macpherson 2000-03-01 These pages practically glow with Kevin Macpherson's rich and powerful paintings! He shares his techniques for quickly capturing the mood of a scene in bold, direct brushstrokes, with step-by-step instructions that make it easy—simply a matter of painting the colors you see. Follow his lead and you too, can create landscapes and still lives in a vibrant, impressionistic style.

The Painter in Oil; a Complete Treatise on the Principles and Technique Necessary to the Painting of Pictures in Oil Colors

Daniel Burleigh Parkhurst 1898 **Capturing Light in Oils** Paul Strisik 2018-09-14 Legendary artist Paul Strisik was not the kind of artist you'd find cooped up inside a studio. As one of the great plein air painters of his generation, Paul preferred

to be outdoors using the sun to light his subjects. His years of experience in capturing that natural light are offered here in *Capturing Light in Oils*.

Painting Light in Oils Peter Wileman 2011-08-18 Peter Wileman is one of the most dynamic oil painters in the UK today and is currently President of the Royal Institute of Oil Painters. In *Painting Light in Oils* he demonstrates how to create atmospheric landscapes in oils with stunning effects. Light is what motivates so many painters. It excites the eye and radiates an energy that transforms an otherwise ordinary scene into something rather special. In his first book, Peter Wileman shows how he gets inspiration for his exciting landscapes and seascapes, working both on location and in the studio. Several step-by-step demonstrations show how he captures light and shade on his canvas with such amazing

effect. There are also sections on tone and colour harmony, reflected and changing light and how to paint from both sketches and photographs. If you want to loosen up your oil painting and achieve landscapes and seascapes that are full of atmosphere, this is the book for you.

Colour and Light in Oils

Nicholas Verrall 2004

PAINTING: OILS. Often seen as dark and gloomy, oils can, in fact, be used to create colourful and light paintings that are wonderfully expressive. One significant characteristic of oil paint is its richness and depth of colour, something that is of particular interest to Nicholas Verrall. In this book, he discusses his working methods and the

importance of colour, at the same time placing these issues within the general context of painting in oils, with all that this has to offer. Includes information, demonstrations and many inspirational finished paintings to help painters understand the value of colour in interpreting ideas with feeling and impact. It provides guidance on a wide range of skills, techniques and advice on subject matter and associated topics. Illustrated throughout. It shows how to use oils and create colourful, light and expressive pictures. Verrall is one of the UK's most respected contemporary figurative painters. It is presented new in paperback.

Capturing Light in Oils Paul Strisik 2020-07-14 "I feel that God's sunlight on a single blade of grass is such a miracle and so difficult to capture in paint, it is worth a lifetime of trying"--Paul Strisik

preferred to be outdoors using the sun to light his subjects. His years of experience in capturing that natural light are offered here in *Capturing Light in Oils*. In these pages, Paul Strisik presents a step-by-step approach to using the three most powerful tools an artist can employ--design, color, and light. Using the techniques taught in this book, Strisik teaches how to use natural conditions to your advantage to create artwork that truly expresses your vision.

Oil Painting Secrets From a Master Linda Cateura

1995-09-01 Some of the most popular art instruction books ever written have been based on student notes culled over the years from actual workshop sessions, with all their power and immediacy - and with practical, on-to-one contact

between student and teacher. This is such a book. For more than two years, Linda Cateura has pursued teacher / artist David A. Leffel, notebook in hand, as he critiqued the work of students. Linda Cateura's succinct notes capture his insights, philosophy, painting hints, and general comments. Leffel's classic, painterly, twentieth-century old master style, much in the manner of Rembrandt or Chardin, affords ample illustration of the ideas expressed - through his many paintings, details, demonstrations, and diagrams, almost all in color. No matter what your level of ability, there is something here to apply to your own work, ideas that will cause you to rething your own ways of painting, hints to save you effort, or solutions to persistent painting problems.

The Complete Oil Painter

Brian Gorst 2004-01-01 Oils are perhaps the most versatile of all paint mediums. Yet for many artists oil painting is either shrouded in mystique or considered very difficult. Filled with clear, step-by-step instructions and surefire strategies, *The Complete Oil Painter* is an essential, one-stop guide to becoming an expert in every aspect of this medium. Artists will discover everything they need to know about materials (pigments, supports, canvases); tools and equipment (palettes, brushes); paint application (wet-into-wet, alla-prima, glazing, impasto); form and color (light and dark, expression, color mixing); exploring themes (still life, portraiture, figure painting); and much more.

Painting into the Light Jenny Aitken 2024-03-31 Reknowned for her techniques for painting light on water, Jenny Aitken delivers perfect guidance to the intermediate artist on how to paint light in plein air and

much more. Learn how to successfully paint scenes that capture magical effects of light from behind the subject. Good contre-jour - painting into the light - artworks cause the viewer to squint, with light seeming to glow from the canvas. They can look like a kind of magic, with their hazy light and colour singing out. This book demystifies lighting in oils, and provides a practical guide to the process, showing exactly how to create the illusion. Inside, you'll find a wealth of information on simplification, tonal control, capturing accurate colour, working both indoors and outdoors, painting landscapes and still life, creating atmospheric depth, and even mastering the illusion of space. Through detailed step-by-step demonstrations and beautifully illustrated techniques, Jenny Aitken reveals how to infuse every painting with vibrant, lifelike light. A section on troubleshooting tricky paintings will show the reader every painting is salvageable, but with an understanding of
