Small Business Sourcebook Carol A. Schwartz 1992-12

Repairing and Extending Doors and Windows H.L. Simmons 1990-12-31 To spite a national trend toward renovation, restoration, and remodeling, construction products producers and their associations are not universally eager to publish recommendations for repairing or extending existing materials. There are two major reasons. First, there are several possible applications of most building materials; and there is an even larger number of different problems that can occur after products are installed in a building. Thus, it is difficult to produce recommendations that cover every eventuality. Second, it is not always in a building construction product producer's best interest to publish data that will help building owners repair their product. Producers, whose income derives from selling new products, do not necessarily applaud when their associations spend their money telling architects and building owners how to avoid buying their products. Finally, in the Building Renovation and Restoration Series we have a reference that recognizes that problems frequently occur with materials used in building projects. In this book and in the other books in this series, xv xvi Series Foreword Simmons goes beyond the promotional hyperbole found in most product literature and explains how to identify common problems. He then offers informed "inside" recommendations on how to deal with each of the problems. Each chapter covers certain materials, or family of materials, in a way that can be understood by building owners and managers, as well as construction and design professionals.

PDCA Cost and Estimating Guide - Volume II 2003 Estimating Guide Volume II - Rates and Tables is a must for all contractors bidding painting and related work. Production rates for surface protection, surface preparation, painting, gypsum board finishing, wallcovering, caulking, and decorative painting are included. Numerous charts and tables simplify the task of performing quantity takeoffs. A new window chart makes it easier than ever to price this important item. Material usage rates and the identification of additional job costs are also discussed.

PDCA Cost and Estimating Guide Robert L. Cusumano 2013 "Cost and Estimating Guide Volume 1: Practices and Procedures presents a step by step method for estimating the cost of painting and decorating work. This manual will present viable methods for those in the industry to accurately perform this important task. Many contractors are looking for that simple magic estimating potion. Unfortunately, a valid one does not exist. Sound estimating is based on a common sense approach to analyzing and projecting costs, not employing some cryptic formula. This manual will present methods that have been found to provide consistent profitable success to those that employ them. This manual is a companion to PDCA's Cost and Estimating Guide Volume 2: Rates and Tables which provides suggested labor production rates and material usage rates as well as tables for estimating quantities of work."-Page 5.
