2008-05-15 Laboratory experiments can be a challenge for teachers in small schools or home schools. This manual and the kit designed to accompany it are an effort to help solve this problem. The hands-on laboratory exercises have been designed with two principle goals in mind: 1) educational challenge and 2) convenience for the teacher. Every experiment clearly teaches a scientific principle. They cover a number of topics usually taught at the 11th or 12th grade level. The equipment has been chosen or, in some cases, developed by the authors, to produce successful results and give the student a real learning experience. This kit is only intended to cover the laboratory portion of a high school physics course. The rest of the course would be

covered in a standard text.LAB
