Response to Disaster Henry W. Fischer 2008-08-21 Response to Disaster combines the original research of author Henry W. Fischer with the literature used today to describe behavioral and organizational challenges commonly experienced before, during, and after disasters. Actual problems are presented and compared to those often misperceived to occur, known as disaster mythology. Fisher examines case studies conducted during the post-impact and long-term recovery periods of major and minor disasters worldwide. He asserts that the role of the mass media assists in eliciting needed help with an effective response, but also perpetuates disaster mythology. Fisher presents striking comparisons between the perception of disaster in the eyes of the general public, the actual situations emergency responders face, and the way mass media reporters broadcast information. Additionally, the problems encountered by emergency response organizations are compared and contrasted with general public and media perceptions of disaster response. Fisher presents the response to September 11, 2001, the south Asian tsunami, and hurricane Katrina in this comprehensive third edition.

Response to Disaster Richard Gist 2013-11-12 Psychological service in the wake of cataclysmic life events has emerged as a prominent and visible component of social response. This has generated a bandwagon of potential service providers, service approaches, and service venues. Where once help was scarce, it has become plentiful enough to engender its own set of conflicts and contradictions along with its intended solace and aid. Response to Disaster reconciles the technical, theoretical, and applied interests represented in these various populations and provides a contemporary treatment that can help define the directions of their increasing interaction.

Handbook of Disaster Research Havidan Rodriguez 2009-11-14 Recent disasters, such as the 2004 Indian Ocean Tsunami, bomb explosions in London, Hurricane Katrina, the Pakistan Earthquake, floods in Central America, and landslides in Indonesia, among many others, have resulted in an extensive loss of life, social disruption, significant economic impacts to local and national economies, and have made headline news in countries throughout the world. Thus the Handbook of Disaster Research is a timely and much needed contribution to the field of disasters. The editors of this Handbook have brought together a comprehensive and interdisciplinary volume with a diverse and international group of contributors. The Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research. Attention is given to conceptual issues dealing with the concept "disaster" and to methodological issues relating to research on disasters, including Geographic Information Systems as a useful research tool and its implications for future research; how disaster research is increasingly being used in the emergency management curriculum; and how research is useful in dealing with emergency operations. The Handbook also includes a number of essays focusing on various types of vulnerabilities. In addition, there are discussions on community processes that are evoked by disasters, including warnings, search and rescue, coordination, and organizational adaptation, as well as, dealing with death and injury, and recovery, and the role of the media in disasters; special attention is given to emergency systems in several nation states. The Handbook also includes contributions focusing on the relationship between disaster and development, the popular culture of disasters, new dimensions of disaster research, as well as projections of disasters into the future. Disasters allow the opportunity for social scientists to study human behavior in which adaptation, resilience and innovation are often more clearly revealed than in "normal" and stable times. The Handbook of Disaster Research provides an interdisciplinary and international approach to disasters with theoretical, methodological, and practical applications.

American History Through Literature, 1870-1920 Tom Quirk 2006 This volume, organized from "addiction" to "Ghost stories," features articles on works, ideas, genres, aesthetics, events, places, societal values, and the history of publishing from 1870 to 1920.

Weapons of Mass Destruction and Terrorism Alan O'Day 2004 The twenty-nine articles explore the issue of WMD and key questions raised about terrorism, its definition, objects, motivation, whether there is a different species of it emerging in the aftermath of the close of the Cold War, preparedness and the means of prevention. The conventional, low-technology terrorism of the past has exercised a social and political impact far out of proportion with the casualties it has caused. The massive, indiscriminate destruction caused by an act of WMD terrorism similarly would have disproportionate social, political, economic and strategic effects.

Solutions to Coastal Disasters 2008 Louise Wallendorf 2008 This collection contains 90 papers presented at the Solutions to Coastal Disasters 2008 conference, held in Turtle Bay, Oahu, Hawaii, April 13-16, 2008.

Response to Disaster Henry W. Fischer 1998 A third-generation disaster researcher challenges what he sees as a myth perpetrated since the genesis of the field in the 1950s that faced with an emergency, most people will panic and flee, become helplessly impassive, or loot. He sets out the empirical evidence in statistics and case studies. He agrees with colleagues that the mass media are a primary factor in spreading the myth, but goes beyond them to address what emergency agencies can do despite it. Graduate

and undergraduate students interested in social response to disasters, the disaster research community, and people responsible for responding to disaster might find the treatment interesting. Annotation copyrighted by Book News, Inc., Portland, OR

Response to Disaster Henry W. Fischer III 1994-07-12 This book provides the reader with a basic understanding of how people and organizations usually respond to a disaster in contrast to how they are usually perceived to respond. The author also describes how and why the mass media helps to provide both accurate and inaccurate information. If each of us were to gain a better understanding of the behavioral and organizational problems commonly encountered during a disaster, we may facilitate more effective mitigation, planning, and disaster response activity in our own communities and in the nation.
