The Rice-Wheat Cropping System of South Asia Palit

Kataki 2024-11-01 The lives of more than a billion people

depend on the answer!Thirty years ago, the Green

Revolution changed the way agriculture was practiced on

the Indo-Gangetic Plain (IGP).

This valuable book critically analyzes and discusses the

rice-wheat cropping system introduced at that time. The

Rice-Wheat Cropping System of South Asia: Trends,

Constraints, Productivity and Policy addresses the crucial

question, "Are the

sustainability and productivity of this system in a state of

decline?" The Rice-Wheat

Cropping System of South Asia brings together information

gathered from research institutions, government

organizations, and farmer surveys. The analysis

concentrates on the trends of

rice-wheat cropping over time, paying special attention to the evidence of and reasons for changes in productivity. It also analyzes the impact of this regional system on soil fertility and water supplies, as well as the increasing demands for new and better fertilizers and pesticides. The Rice-Wheat Cropping System of South Asia looks at the problems that have arisen for both the rice and wheat phases, including: the need for changes in crop establishment techniques for crop diversification declining soil fertility changes in pest populations a host of water-management issues the need for policy redirection to sustain productivity growth the impact of global climate change sustainable improvements in productivity This informative book is an essential planning tool for agronomists, policymakers, and agroeconomists. It is also a useful reference for anyone interested in the problems of famine and intensive cropping not only in South Asia but in the world.

Handbook on Psychosocial Aspects of Geriatric Mental Health Issues Mala Kapur

Shankardass 2026-05-03 This handbook provides an authoritative and comprehensive overview of geriatric mental health from a psychosocial standpoint in South Asia and beyond. It focuses on the policy and psychosocial aspects of geriatric mental health care and provides a global perspective on the well-being of older people. Leading scholars and practitioners present the importance of geriatric mental health care and provide insights into plausible solutions. The coverage encompasses everything from geriatric psychiatry, changing lifestyles, physical environments, ethical issues, healthcare facilities, developmental disabilities - and much more. The book provides an outstanding reference that summarizes and synthesizes current knowledge about the psychosocial aspects

of geriatric mental health care. The reference work is divided into more than ten sections to cover the psychosocial stance of geriatric mental care comprehensively. Each section is dedicated to a particular perspective relating to geriatric mental care. The reference is essential reading for students, professors, researchers, and scholars in public health, psychiatry, social sciences, medicine, and health sciences.

Watersheds Downhill:

Landscape Ecology and

Conservation Perspectives

Ganga Ram Regmi 2020-05-04

This book describes the myriad components of the Hindu Kush-Himalaya (HKH) region. The contributors elaborate on challenges, failures, and successes in efforts to conserve

the HKH, its indigenous plants and animals, and the watershed that runs from the very roof of the planet via world-rivers to marine estuaries, supporting a human population of some two billion people. Readers will learn how the landforms, animal species and humans of this globally fascinating region are connected, and understand why runoff from snow and ice in the world's tallest mountains is vital to inhabitants far downstream. The book comprises forty-five chapters organized in five parts. The first section, Landscapes, introduces the mountainous watersheds of the HKH, its weather systems, forests, and the 18 major rivers whose headwaters are here. The second part explores concepts, cultures, and religions, including ethnobiology and indigenous regimes, two thousand years of religious tradition, and the history of scientific and research expeditions. Part Three discusses policy, wildlife conservation management,

habitat and biodiversity data, as well as the interaction of animals and humans. The fourth part examines the consequences of development and globalization, from hydrodams, to roads and railroads, to poaching and illegal wildlife trade. This section includes studies of animal species including river dolphins, woodpeckers and hornbills, langurs, snow leopards and more. The concluding section offers perspectives and templates for conservation, sustainability and stability in the HKH, including citizen-science projects and a future challenged by climate change, growing human population, and global conservation decay. A large assemblage of field and landscape photos, combined with eye-witness accounts, presents a 50-year local and wider perspective on the HKH. Also included are advanced digital topics: data sharing, open access, metadata, web portal databases, geographic information systems (GIS) software and machine learning,

and data mining concepts all relevant to a modern scientific understanding and sustainable management of the Hindu Kush-Himalaya region. This work is written for scholars, landscape ecologists, naturalists and researchers alike, and it can be especially well-suited for those readers who want to learn in a more holistic fashion about the latest conservation issues.
