Security in the Bubble Christine Hentschel 2015-08-08 Focusing on the South African city of Durban, *Security in the Bubble* looks at spatialized security practices, engaging with strategies and dilemmas of urban security governance in cities around the world. While apartheid was spatial governance at its most brutal, postapartheid South African cities have tried to reinvent space, using it as a "positive" technique of governance. Christine Hentschel traces the contours of two emerging urban regimes of governing security in contemporary Durban: handsome space and instant space. Handsome space is about aesthetic and affective communication as means to making places safe. Instant space, on the other hand, addresses the crime-related personal "navigation" systems employed by urban residents whenever they circulate through the city. While handsome space embraces the powers of attraction, instant space operates through the powers of fleeing. In both regimes, security is conceived not as a public good but as a situational experience that can. No longer reducible to the after-pains of racial apartheid, this city's fragmentation is now better conceptualized, according to Hentschel, as a heterogeneous ensemble of bubbles of imagined safety.

Global Perspectives on Green Business Administration and Sustainable Supply Chain Management Khan, Syed Abdul Rehman 2019-12-15 Heavy industrialization in the past few decades has caused several global environmental issues including poor air quality, climate change, and outdoor air pollution-related diseases. As such, consumer pressure coupled with strict governmental policies have influenced firms to adopt and implement green practices in their supply chain and business operations in order to improve socio-environmental sustainability. *Global Perspectives on Green Business Administration and Sustainable Supply Chain Management* is an essential reference book that discusses innovative green practices including recycling, remanufacturing, reduction in waste and adoption of renewable energy in manufacturing. It also examines environmentally friendly policies that have been adopted by many European and Western countries. Featuring coverage on a broad range of topics such as energy analysis, environmental protections, and logistics development, this book is ideally designed for managers, operations managers, executives, manufacturers, environmentalists, researchers, industry practitioners, academicians, and students.
