*Celestial Navigation for
Yachtsmen* Mary Blewitt
2017-04-06 The 13th edition of
this bestselling book is proof of
the success of Mary Blewitt's
concise and clear style in
explaining a particularly
difficult skill, and it has been
the bible for many generations
of ocean navigators. Since this
book was first published, the
huge advances in electronic
navigation have transported
most offshore navigators to a
world of press-button
convenience. However, there is
still a vital need for traditional
skills when things go wrong:
batteries can fail, aerials go

overboard, and electronics
have been known to get wet. A
bestseller for over 65 years,
*Celestial Navigation for
Yachtsmen* is a model of
simplicity and clarity. The
worked examples require only
straightforward addition and
subtraction, which explains
why this book has truly earned
its reputation for admirable
conciseness and for making a
tricky subject easy to
understand. This edition has
been thoroughly revised by
Andy Du Port, the highly
respected ex-editor of *Reeds

Sextant David Barrie

2014-05-13 In the tradition of Dava Sobel's Longitude comes sailing expert David Barrie's compelling and dramatic tale of invention and discovery—an eloquent elegy to one of the most important navigational instruments ever created, and the daring mariners who used it to explore, conquer, and map the world. Since its invention in 1759, a mariner's most prized possession has been the sextant. A navigation tool that measures the angle between a celestial object and the

horizon, the sextant allowed sailors to pinpoint their exact location at sea. David Barrie chronicles the sextant's development and shows how it not only saved the lives of navigators in wild and dangerous seas, but played a pivotal role in their ability to map the globe. He synthesizes centuries of seafaring history and the daring sailors who have become legend, including James Cook, Matthew Flinders, Robert Fitz-Roy, Frank Worsley of the Endurance, and Joshua Slocum, the redoubtable old "lunarian" and first single-handed-round-the-world yachtsman. He also recounts his own maiden voyage, and insights gleaned from his experiences as a practiced seaman and navigator. Full of heroism, danger, and excitement, told with an infectious sense of wonder, Sextant offers a new look at a masterful achievement that changed the course of history. Two hundred fifty years of seafaring history, told through the lens of one ingenious instrument. Invention and

Discovery: Follow the sextant from its revolutionary invention in 1759, tracing how this single tool opened up the world to exploration and accurate mapping. Maritime History: Sail alongside legendary mariners like Captain James Cook, Matthew Flinders, and Joshua Slocum, seeing their historic voyages through the instrument they relied on most. Age of Sail Adventure: Relive harrowing tales of survival at sea, from Bligh's incredible open-boat journey to Frank Worsley's desperate navigation for the shipwrecked Endurance crew. Narrative Nonfiction: Discover a story told with an infectious sense of wonder, blending deep historical research with the author's own firsthand experience as an expert sailor.
