British History in the Nineteenth Century (1782-1901) George Macaulay Trevelyan 1930

The Early History of the Viol Ian Woodfield 1988-04-21 This book traces the development of the viol from its late medieval Spanish origins to the sixteenth century, when it became the most widely played bowed instrument in western Europe. Ian Woodfield examines the two most important ancestors of the instrument, the Moorish rahab and the vihuela de mano. From these two instruments emerged an early form of viol, the Valencian vihuela de arco, which spread rapidly across the Mediterranean during the papacy of Rodrigo Borgia. The viol was enthusiastically accepted by the d'Este and Gonzaga families and other Italian arbiters before migrating across the Alps and into the rest of Europe. The author discusses all aspects of the viol during its Renaissance hey-day: the growing perfection of viol design at the hands of Italian craftsmen; the gradual evolution of tuning systems; the development of advanced playing techniques and the wide range of music, both solo and consort. The final chapter examines the growth of a viol playing tradition in sixteenth-century England, in particular in the London choir-schools. Dr Woodfield brings iconographic evidence and an interesting approach to this study which will be of interest to musicologists, iconographers, organologists and viol players.

The Early History of Ismaili Jurisprudence Agostino Cilardo 2012-03-12 Researchers have shed light on the literary production of the Ismailis since the early 1930s. The cataloguing of these work has been carried out by Ivanow, Fyzee, Goriawala, Poonawala, Gacek, Cortese and de Bloise. Many works attributable to Ismaili scholars, however, are still unavailable either because they remain hidden in private collections or

because they have not survived. Ismaili law, in particular, is still a largely unexplored field of study. Al-Qadi Abu Hanifa al-Nu'man is generally considered the founder and greatest exponent of Ismaili jurisprudence, Many of his works have been lost, and information on some others is scattered; yet other works remain in manuscript form, and only a few have been published. The present book is a critical edition and translation of al-Nu'man's Minhaj al-fara'id, based on its three known copies. It deals with the law of inheritance, one of the most complex in Islamic law. In comparing the Minhaj with two published works (the Da'a'im al-Islam and Kitab al-iqtisar) as well as a manuscript (Mukhtasar al-athar) of al-Nu'man, a significant doctrinal evolution clearly emerges, reflecting his early Maliki training and then his work under four Fatimid imams. Ismaili law is also compared with the doctrines of the Imami school as well as the legal system of the four Sunni schools. This book thus allows us to determine the time of the composition of the Minhaj al-fara'id, the development and the originality of Ismaili jurisprudence, and its relation to other schools of law.

The Early History of God Mark S. Smith 2002-08-03 Foreword by Patrick D. Miller In this remarkable, acclaimed history of the development of monotheism, Mark S. Smith explains how Israel's religion evolved from a cult of Yahweh as a primary deity among many to a fully defined monotheistic faith with Yahweh as sole god. Repudiating the traditional view that Israel was fundamentally different in culture and religion from its Canaanite neighbors, this provocative book argues that Israelite religion developed, at least in part, from the religion of Canaan. Drawing on epigraphic and archaeological sources, Smith cogently demonstrates that Israelite religion was not an outright rejection of foreign, pagan gods but, rather, was the result of the progressive establishment of a distinctly separate Israelite identity. This thoroughly revised second edition of *The Early History of God* includes a substantial new preface by the author and a foreword by Patrick D. Miller.
