Cultural Identity and Global Process Jonathan Friedman 1994-12-09 This fascinating book explores the interface between global processes, identity formation and the production of culture. Examining ideas ranging from world systems theory to postmodernism, Jonathan Friedman investigates the relations between the global and the local, to show how cultural fragmentation and modernist homogenization are equally constitutive trends of global reality. With examples taken from a rich variety of theoretical sources, ethnographic accounts of historical eras, the analysis ranges across the cultural formations of ancient Greece, contemporary processes of Hawaiian cultural identification and Congolese beauty cults. Throughout, the author examines the interdependency of world market and local cultural

Many Globalizations Peter L. Berger 2002 'Many Globalizations' is an attempt to account for the cultural impact of globalisation in the lives of ordinary citizens from ten countries. Globalization and Civilizations Mehdi Mozaffari 2003-09-02 Globalization and Civilizations challenges established assumptions about the nature of civilizations and the supposed inevitability of the conflict between the Islamic and Western worlds. Uniquely, this edited book critically interrogates the concept of 'civilization' by asking whether it is still valid in the globalized world economy of the twenty-first century. The first half of the book provides an historical and theoretical context to understand the idea of 'civilization' in political science and demonstrates how the various social, economic, political and cultural processes of globalization have radically altered perceptions of civilization. The second half of the book looks particularly at non-Western examples of the interaction between globalization and civilization and includes case studies on the Arab world, Islam, China, India and Europe

Globalization and Culture Jan Nederveen Pieterse, Mellichamp Professor of Global Studies and Sociology 2015-02-12 Now fully revised and updated, this book argues that we are witnessing the formation of a global *mélange* culture through processes of cultural mixing. Globalization Roland Robertson 1992-07-27 A stimulating appraisal of a crucial contemporary theme, this comprehensive analysis of globalizatoin offers a distinctively cultural perspective on the social theory of the contemporary world. This perspective considers the world as a whole, going beyond conventional distinctions between the global and the local and between the universal and the particular. Its cultural approach emphasizes the political and economic significance of shifting conceptions of, and forms of participation in, an increasingly compressed world. At the same time the book shows why culture has become a globally contested issue - why, for example, competing conceptions of 'world order' have political and economic consequences.

Modernization, Globalization and the Problem of Culture in World-systems Theory

Culture, Globalization and the World-system 1991

Global Culture Mike Featherstone 1990-08 In this book leading social scientists from many countries analyze the extent to which we are seeing a globalization of culture. Is a unified world culture emerging? And if so, how does this relate to existing cultural divisions and to the autonomy of the nation state? Differing explanations are offered for trends towards global unification and their relation to an economic world-system. Will the intensification of global contact produce increasing tolerance of other cultures? Or will an integrating culture produce sharper reactions in the form of fundamentalist and nationalist movements? The contributors explore the emergence of 'third cultures', such as international law, the financial markets and media conglomerates, as

Globalization: Culture and identity Roland Robertson 2003

Globalization and Culture - Could one system embrace all cultures Franziska Schmidt 2005-08-30 Seminar paper from the year 2003 in the subject Business economics - Business Management, Corporate Governance, grade: 1,0, Otto-von-Guericke-University Magdeburg, course: English UNICERT IV, language: English, abstract: The paper "Globalization and Culture" deals with the question of whether it is possible for one system to embrace all cultures. Globalization is the development towards an integrated world system embracing all main schools of thought across all levels of society. The main proponents of this development are technological and institutional advancements. After looking at the main stepping stones in the historical development of globalization a definition of culture is given. Culture is seen as an agreement between people belonging to a group and concerns the meaning of certain actions. Cultures consists of attitudes, beliefs and values. Their elements differ between families, companies and nations. Although these differences exist, there is a tendency towards cultural homogenization caused by globalization. The paper discusses whether it is possible that one system could work for all. It outlines that deep cultural differences still exist. International organizations and national governments have made attempts to save local cultures showing how important it is to protect them. In conclusion it is stressed that it is more important to work on a global acceptance and awareness of other cultures than on creating a global village with a global culture.

Culture Professor of Art History and Sociology Anthony D King 1997 One of the inaugural books discussing the increasing tendency of cultural practices to cross national boundaries. Updated with a new preface, these influential essays by a distinguished group of cultural critics lay the groundwork for a vital new field of inquiry.
