Bednowitz 2013-04-17 A brief  
historical account of the  
background leading to the  
publication of the first four  
editions of the World Directory  
of Crystallographers was  
presented by G. Boom in his  
preface to the Fourth Edition,  
published late in 1971. That  
edition was produced by  
traditional typesetting methods  
from compilations of  
biographical data prepared by  
national Sub-Editors. The  
major effort required to  
produce a directory by manual  
methods provided the impetus  
to use computer techniques for

the Fifth Edition. The account of the production of the first computer assisted Directory was described by S.C. Abrahams in the preface of the Fifth Edition. Computer composition, which required a machine readable data base, offered several major advantages. The choice of typeface and range of characters was flexible. Corrections and additions to the data base were rapid and, once established, it was hoped updating for future editions would be simple and inexpensive. The data base was put to other Union uses, such as preparation of mailing labels and formulation of lists of crystallographers with specified common fields of interest. The Fifth Edition of the World Directory of Crystallographers was published in June of 1977, the Sixth in May of 1981. The Subject Indexes for the Fifth and Sixth Editions were printed in 1978 and 1981 respectively, both having a limited distribution.
