

## Focus On Grammar 4th Edition

*The Cambridge Handbook of English Corpus Linguistics* Douglas Biber 2015-06-25 The Cambridge Handbook of English Corpus Linguistics (CHECL) surveys the breadth of corpus-based linguistic research on English, including chapters on collocations, phraseology, grammatical variation, historical change, and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub-discipline, and the inclusion of empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus-based studies in this area, with discussion of what those studies found, and why they are important. Each chapter also includes a critical discussion of the corpus-based methods employed for research in this area, as well as an explicit summary of new findings and discoveries.

**The Essentials of Tutoring** Paul Gary Phillips 2004-04-14 This straightforward and practical primer on an often-overlooked area of instruction fills an important need for coordinators of writing centers, program directors, teaching assistants, new instructors, peer tutors, writing coaches, and all others involved in tutoring writers. Co-written by an English department chair and a writing lab coordinator at a diverse two-year school in California, Essentials of Tutoring is organized into three parts: an overview of tutoring basics, sentence-level tutoring and help for ESL students, and helping students with essays and research papers.

Specificational and Presentational There-Clefts Kristin Davidse 2023-07-31 This book proposes a radically new account of clefts in English. Since the 1960s, functional as well as formal linguists have generally restricted clefts to constructions with an identifying matrix (it-clefts) and have claimed that they only code information structure. Clefts are assumed to unpack a simple proposition into a focus - presupposition structure. In this book, the authors reject these theoretical-descriptive assumptions, arguing instead that clefts form a field comprising it-clefts, there-clefts and 'have'-clefts. They show that, like any other construction, clefts compositionally code propositional semantics, onto which a great variety of prosodically coded focus patterns may be mapped. The authors fundamentally challenge the existing approach by entering the debate with an in-depth account of the neglected specificational and presentational there-clefts, offering the first systematic data-based study of their grammatical and prosodic features. While the study is restricted to English, its findings have significant cross-linguistic relevance. This book will be of interest to students and scholars of Functional, Cognitive and Formal Linguistics, Corpus Linguistics, and usage-based study of grammar and prosody.

**Creation and Christ** Angela Costley 2020-11-09 The Epistle to the Hebrews is usually associated with its theology of Christ the High Priest. However, the term "high priest" is not so common in the first four chapters of Hebrews, occurring only four times with a further reference to sacrifice in 1:3. Rather than emphasising the priestly or sacrificial activity of Christ, these opening sections contain a number of references to creation: 1:2-3,10-12, 2:5-9, 10; 3:1-6; 4:3-4 and 4:9-10. In this volume, Angela Costley uses discourse analysis to explore the importance of the topic of creation to the discourse of the Epistle to the Hebrews, uncovering a close link between creation and salvation. She highlights the interaction of the topic of creation with the topic of salvation in the discourse to uncover a depiction of Christ as the creator who descends to take on human flesh, God who becomes human, in order to lead humanity heavenward.
