The Psychology of Elementary Education Austin Southwick Edwards 1925

Chemistry Thomas R. Gilbert 2013-08-06 The authors, who have more than two decades of combined experience teaching an atoms-first course, have gone beyond reorganizing the topics. They emphasize the particulate nature of matter throughout the book in the text, art, and problems, while placing the chemistry in a biological, environmental, or geological context. The authors use a consistent problem-solving model and provide students with ample opportunities to practice.

Methods in Nucleic Acids Research Gregory W. Warr 1990-11-26 Methods in Nucleic Acids Research provides extensively referenced overviews of chapter topics, in addition to step-by-step laboratory protocols. Topics include discussions regarding the preparation and assay of antibodies against oligopeptides, RNA footprinting, gel-retardation assays for nucleic acid binding proteins, in vitro transcription and translation assays for studies of eukaryotic gene expression, human genome mapping, forensic analysis of DNA polymorphism, in situ hybridization for the detection of specific RNA, and other methods. Biochemists, molecular biologists, immunologists, cell biologists, and geneticists will find this book invaluable for their research.
