The Closing of the Auditor's Mind? David J. O'Regan 2024-12-10 In *The Closing of the Auditor's Mind?*, author David J. O'Regan describes internal auditing as an important "binding agent" of social cohesion, for the accountability of individuals and organizations and also at aggregated levels of social trust. However, O'Regan also reveals that internal auditing faces two severe challenges - an external challenge of

adaptation and an internal challenge of fundamental reform. The adaptation challenge arises from ongoing, paradigmatic shifts in accountability and social trust. The command- and- control, vertical hierarchies of traditional bureaucracies are being replaced in importance by networked, flattened patterns of accountability. The most challenging assurance demands of the modern era are increasingly located in three institutional domains - in the inner workings of organizations; in intermediary spaces at organizational boundaries; and in extra-mural locations. Internal auditing continues to cling, barnacle- like, to the inner workings of traditional, bureaucratic structures, and it has little to offer the emerging assurance demands on or beyond institutional boundaries. The reform challenge arises from internal auditing's prevailing tendency toward a rigid, algorithmic, checklist mindset that suppresses practitioners' creativity and critical thinking. This trend is increasingly narrowing internal auditing's intellectual and moral horizons. Under the pressures of these challenges, internal auditing is struggling to fulfil its primary purpose of serving the public interest. O'Regan's powerful book focuses on: The redistribution of social trust from traditional, hierarchical institutions to diffuse, horizontally distributed networks The perennial validity of the classical virtues as the humane foundation of professional activity The role of creative expertise in promoting professional wisdom *The Closing of the Auditor's Mind?* is a philosophical audit of a profession on the threshold of crisis. The book presupposes no prior knowledge of philosophy, nor indeed of auditing. Philosophical technicalities are contained in an Appendix, leaving the main text jargon-free. O'Regan provides original and striking perspectives on the malaise of modern internal auditing, and he proposes radical remedies. This captivating and well-informed book is a must-read for all who are concerned with our collective socio-economic and political well-being.

Journal of Government Financial Management 2001

Internal Auditing Kurt F. Reding 2007 Presents a textbook aimed at undergraduate and graduate students enrolled in introductory internal auditing courses. Covers the basic audit concepts that internal auditors need to know and understand, and looks at how internal audit assurance and consulting engagements are planned and performed and how engagement outcomes are communicated.

Healthcare Financial Management 2008

Creative and Innovative Auditing Jeffrey Ridley 2017-12-01 Bringing creativity and innovation into all professions and types of auditing today, this book meets the needs of auditing practices in the future. Recent criticisms of auditing practices by financial regulators, the traditional 'expectation gaps' between auditors and auditees and the continuing advances in technology make it even more important today to motivate creativity and innovation in the professions of auditors, be they internal, external, quality, environmental, social, clinical and so on. In *Creative and Innovative Auditing*, Jeffrey Ridley studies all auditing practices, not just internal auditing, using an innovation model he has developed through research which is applicable to all auditing organisations and professions. He shows how motivating innovation in auditing practices will address the needs of today and tomorrow's auditing of governance, risk management and control.
