Studies begin at the most basic level and progress in difficulty. This chapter provides guitarists with tools for constructing their own technical exercises. Part 4 presents accompaniment patterns for a wide variety of pop styles such as folk, rock/blues, country/bluegrass, jazz and some Latin styles including bossa nova and samba. Basic fingerstyle accompaniment patterns are taught with rhythmic notation and string numbers. Part 5 presents alternate changes and substitutions for the blues that can be easily transposed. Blues progressions and an etude are included for practicing your comping. Part 8 presents a wealth of information about playing over the last two measures of jazz tunes. Jazz Chord Progressions Bill Boyd 1997 (Piano Method). This book contains the chord progressions found in most jazz standards. Each progression is written with chord voicings which are indigenous to the style. The book is divided into two sections. The first section uses chord voicings with the root as the bottom note. This voicing is appropriate when playing with a jazz group where there is no bass player. Chord voicings with the third or seventh of the chord as the bottom note are the basis for section two. This voicing is useful when a bass player is present to provide the root movement. The same progressions appear in both sections. The study of this material will help prepare the player for fake book reading and comping with a group.
