

Pressure Vessel Autoclave Engineers

A solid in contact with a fluid experiences a force all over its outer surface. Pressure is the ratio of the force applied to the area over which it is exerted. Fluid pressure has no direction, being a scalar quantity. The forces due to pressure have well-defined directions: they are always exerted perpendicular to any surface. Feb 6, 2026 · Pressure is an external force applied over a surface, while stress is the internal force developed within a material due to applied pressure. Pressure is always compressive, whereas ...
