**A Multimodal and Ethnographic Approach**

**to Textbook Discourse** Germán Canale

2022-08-30 This book offers a new framework

for analysing textbook discourse, bridging the

gap between contemporary ethnographic

approaches and multimodality for a contextually

sensitive approach which considers the

multiplicity of multimodal resources involved in

the production and use of textbooks. The volume

makes the case for textbook discourse studies to

go beyond studies of textual representation and

critically consider the ways in which textbook

discourse is situated within wider social

practices. Each chapter considers a different

social semiotic practice in which textbook and

textbook discourse is involved: representation,

communication, interaction, learning, and

recontextualization. In bringing together this

work with contemporary ethnography

scholarship, the book offers a comprehensive

toolkit for further research on textbook

discourse and pushes the field forward into new

directions. This innovative book will be of

particular interest to students and scholars in

discourse analysis, multimodality, social

semiotics, language and communication, and

curriculum studies.
