**College Textbooks** Melissa Emrey-Arras 2013-07-11 The rising costs of postsecondary education present challenges to maintaining college affordability. Textbooks are an important factor students need to consider when calculating the overall cost of attending college. In an effort to ensure that faculty and students have sufficient information about textbooks, Congress included requirements in the Higher Education Opportunity Act (HEOA) concerning publisher and school disclosures, as well as publisher provision of individual course materials. This report addresses (1) the efforts publishers have made to provide textbook information to faculty and make bundled materials available for sale individually, and how these practices have informed faculty selection of course materials; and (2) the extent to which postsecondary schools have

provided students and college bookstores access to textbook information, and what the resulting costs and benefits have been. Tables and figures. This is a print on demand report.

### **A Multimodal and Ethnographic Approach to Textbook Discourse**

Germán  
Canale 2022-08-30 This book  
offers a new framework for  
analysing textbook discourse,  
bridging the gap between  
contemporary ethnographic  
approaches and multimodality  
for a contextually sensitive  
approach which considers the  
multiplicity of multimodal  
resources involved in the  
production and use of

textbooks. The volume makes  
the case for textbook discourse  
studies to go beyond studies of  
textual representation and  
critically consider the ways in  
which textbook discourse is  
situated within wider social  
practices. Each chapter  
considers a different social  
semiotic practice in which  
textbook and textbook  
discourse is involved:  
representation,  
communication, interaction,  
learning, and  
recontextualization. In bringing  
together this work with  
contemporary ethnography  
scholarship, the book offers a  
comprehensive toolkit for  
further research on textbook  
discourse and pushes the field  
forward into new directions.  
This innovative book will be of  
particular interest to students  
and scholars in discourse  
analysis, multimodality, social  
semiotics, language and  
communication, and  
curriculum studies.
