A Multimodal and Ethnographic Approach to Textbook Discourse Germán
Canale 2022-08-30 This book offers a new framework for analysing
textbook discourse, bridging the gap between contemporary
ethnographic approaches and multimodality for a contextually sensitive
approach which considers the multiplicity of multimodal resources
involved in the production and use of textbooks. The volume makes the

case for textbook discourse studies to go beyond studies of textual
representation and critically consider the ways in which textbook
discourse is situated within wider social practices. Each chapter
considers a different social semiotic practice in which textbook and
textbook discourse is involved: representation, communication,
interaction, learning, and recontextualization. In bringing together this
work with contemporary ethnography scholarship, the book offers a
comprehensive toolkit for further research on textbook discourse and
pushes the field forward into new directions. This innovative book will be
of particular interest to students and scholars in discourse analysis,
multimodality, social semiotics, language and communication, and
curriculum studies.
